

Power Bank

OnPower 240

Never slow down and never run out of power again. The OnPower 240 is built for those who demand power without limits whether it's racing through a variety of workday tasks, embarking on a fun adventure, or juggling multiple devices at once.

With 140W ultra-rapid charging, this powerbank can fuel up your devices at incredible speeds, from laptops to smartphones and everything in between. Equipped with three ports and support for PD3.1, PPS, QC3.0, AFC & SCP, it delivers optimized power to every device, making sure there's efficiency and compatibility across the board.

Its massive 25,000mAh capacity means you're covered for the long haul: multiple charges for your phone, extended life for your tablet, or enough energy to keep your laptop going when there's no outlet close to you. And thanks to simultaneous charging for three devices, you never have to choose between staying connected or sharing power.

A digital display will keep you informed with real-time battery status, while six layers of advanced protection ensure safety, efficiency, and durability. Whether you're on the road, in the air, or off the grid, the OnPower 240 keeps you powered up without a worry in sight.

AIRLINE-FRIENDLY POWER FOR YOUR TRAVELS

The OnPower 240 is compact yet powerful; it's safe for air travel and has enough energy to keep you powered during long-haul flights, business trips, or outdoor adventures. You won't have to search for outlets this time.

HUGE CAPACITY

With a massive 25,000mAh battery, the OnPower 240 can keep you connected for days. It provides multiple full charges for your smartphone, keeps your tablet running for hours, and even delivers enough power to extend your laptop's battery life – perfect for work, entertainment, and emergencies.

25,000mAh

SUPER FAST CHARGING WITH PD 3.1

Experience the latest in USB fast-charging technology with Power Delivery 3.1 (PD 3.1), capable of delivering up to 140W.

This means faster, more efficient charging, not just for phones and tablets, but even high-performance laptops. You'll never run out of power when it matters most.

PD 3.1

PPS: SMART & SAFE FAST CHARGING

Powered by Programmable Power Supply (PPS), this intelligent charging technology dynamically adjusts voltage and current in real-time. This prevents overheating and extends battery life, making charging faster, safer, and more efficient for all compatible devices.

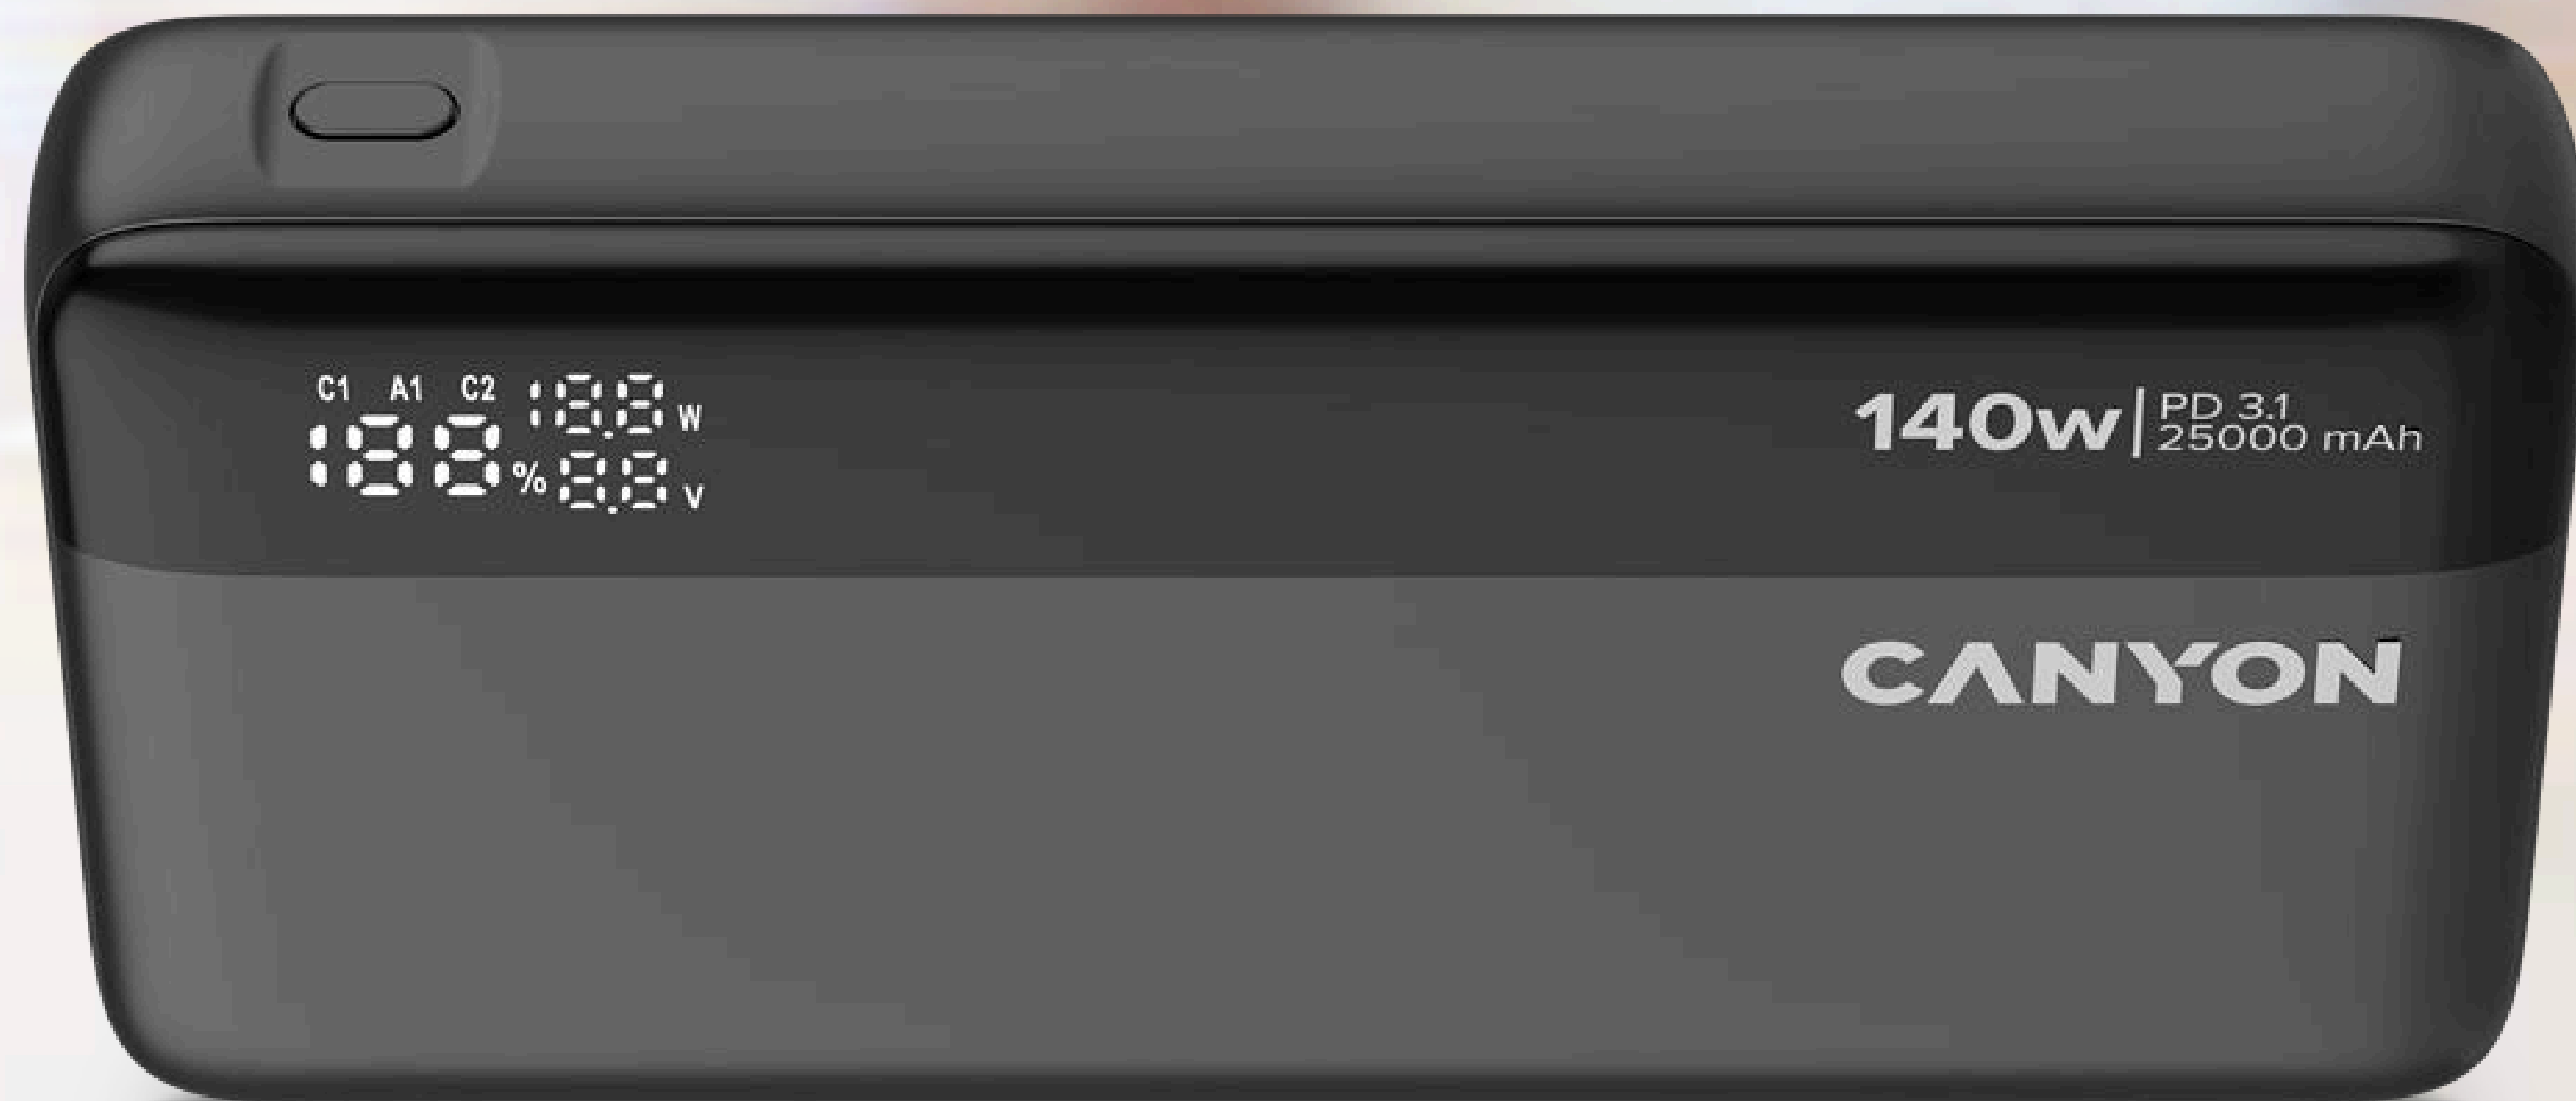

QC 3.0: UP TO 4× FASTER CHARGING

With Qualcomm Quick Charge 3.0, power up your smartphone up to 4 times faster than standard chargers. This cutting-edge charging protocol provides ultra-fast and efficient energy transfer, making it perfect for devices that support QC technology.

ADAPTIVE FAST CHARGING (AFC)

Samsung users, this one's for you! Similar to QC, Adaptive Fast Charging (AFC) provides rapid and efficient power delivery, keeping your devices charged and ready to go without unnecessary downtime.

2-WAY FAST CHARGING: POWER UP YOUR DEVICES & POWER BANK

The OnPower 240 does more than charging your devices: it recharges itself at top speed. With two-way fast charging, you can power up both your gadgets and the power bank at the same time, and you'll always be ready for action.

SIMULTANEOUS CHARGING UP TO 3 DEVICES

No more waiting! With three charging ports, the OnPower 240 allows you to charge up to three devices at once. Whether it's your phone, tablet, smartwatch, or laptop, share the power and stay connected with everything you need.

POWER DISPLAY: STAY IN CONTROL

The built-in digital display gives you real-time battery percentage updates, so you always know exactly how much power is left. No more guessing – just clear, instant information for smarter energy management.
