To use your food processor

- Fit the detachable shaft (2) onto the power unit (1).
- Then fit the bowl. Place the handle towards the back and turn clockwise until it locks (3).
- Fit an attachment over the drive shaft.
- Always fit the bowl and attachment onto the machine before adding ingredients.
- Fit the lid (C).
- Switch on and select a speed.
- The processor won't work if the bowl and lid are fitted incorrectly.
- Use the pulse (p) for short bursts. The pulse will operate for as long as the control is held in position.
- Reverse the above procedure to remove the lid, attachments and bowl.
- Always switch off before removing the lid.

Important

- When adding almond essence or flavoring to mixtures avoid contact with the plastic as this may result in permanent marking.

To use your liquidiser

- Fit the sealing ring (14) into the blade unit (15) ensuring the seal is located correctly. Leaking will occur if the seal is damaged or not fitted correctly.
- Screw the jug onto the blade unit.
- Put your ingredients into the jug.
- Put the lid cover in the lid, then turn.
- Turn the lid in a clockwise direction to lock onto the jug.
- Place the liquidiser onto the power unit and turn to lock (D).
- Select a speed or use the pulse control.
- Allow all liquids to cool to room temperature before placing them in the liquidiser.

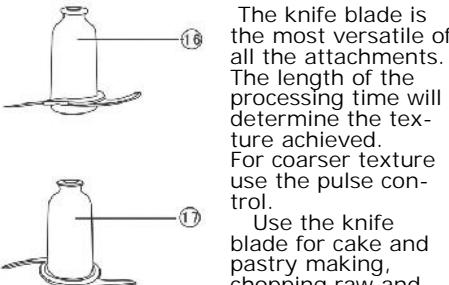

Hints

- When making mayonnaise, put all the ingredients, except the oil, into the liquidiser. With the machine

- running, pour the oil into the bowl (taking the lid cover out of the blender lid) and let it run through.
- Thick mixtures, e.g. pates and dips, may need scraping down. If it's difficult to process, add more liquid.
- When crushing ice use the pulse in short bursts.
- To ensure the long life of your liquidiser, never run it for longer than 30-60 seconds. Switch off as soon as you've got the right consistency.
- The machine won't work if the liquidiser is fitted incorrectly.
- Don't put dry ingredients into the liquidiser before switching on. If necessary, cut them into pieces; remove the lid cover; then with machine running, drop them through one by one.
- Don't use the liquidiser as a storage container. Keep it empty before and after use.
- Never blend more than 1.2 liters – less for frothy liquids like milkshakes.

Using the attachment

Knife blade 16 / dough tool 17

The knife blade is the most versatile of all the attachments. The length of the processing time will determine the texture achieved.

For coarser texture use the pulse control.

Use the knife blade for cake and pastry making, chopping raw and

cooked meat, vegetables, nuts, pate, dips, pureeing soups and to also make crumbs from biscuits and bread. It can also be used for yeasted dough mixes if the dough tool is not supplied.

Use the dough tool for yeasted mixes.

Hints

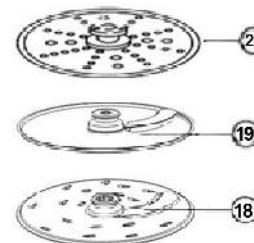

Knife blade

- For more efficient food processing it is recommended to cut products into cubes of about 2cm.
- Biscuits should be broken into pieces and added down the feed tube whilst the machine is running.
- When making pastry use fat straight from the fridge cut into 2cm/3/4in cubes.
- Take care not to over-process.

Dough tool

- Place the dry ingredients in the

- bowl and add the liquid down the feed tube whilst the machine is running. Process until a smooth elastic ball of dough is formed this will take 30-60 sec.
- Re-knead by hand only. Re – kneading in the bowl is not recommended as it may cause the processor to become unstable.
- Slicing/ shredding/mashing discs 18/19/20

Slicing/ shredding disc, 18

- Use the shredding side for cheese, carrots, potatoes and foods of a similar texture.
- Use the slicing side for cheese, carrots, potatoes, cabbage cucumber, courgette, beetroot and onions.

French potato disc 19

Use to cut: French potatoes; firm ingredients for salads, garnishes, casseroles and stir fries(e.g. carrot, swede, courgette, cucumber).

Potato mashing disc 20

Use to mashing potato etc.

Safety

- Never remove the lid until the cutting disc has completely stopped.
- Handle the cutting discs with care – they are extremely sharp.

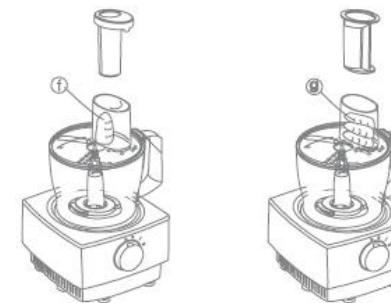

To use the cutting discs

- Fit the drive shaft and bowl onto the power unit.
- Holding by the centre grip (d), place the disc onto the drive shaft with the appropriate side uppermost (e).
- Fit the lid.
- Put the food in the feed tube.
- Switch on and push down evenly with the pusher-never put your fingers in the feed tube.

Hints

- Use fresh ingredients.
- Don't cut food too small
- When using the chipper disc, place ingredients horizontally.
- When slicing or shredding: food placed upright (f) comes out shorter than food placed horizontally (g).

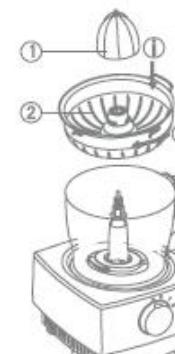

Citrus press 21

Use the citrus press to squeeze the juice from citrus fruits (e.g. oranges, lemons, limes and grapefruits).

Cone ①

Sieve ②

To use the citrus press

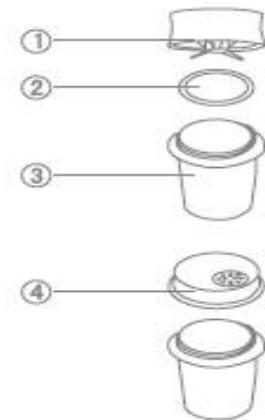

- Fit the drive shaft and bowl onto the power unit.
- Fit the sieve into the bowl – ensuring the sieve handle is licked into position directly over the bowl handle (h).
- Place the cone over the drive shaft turning until it drops all the way down (i).
- Cut the fruit in half. Then switch on and press the fruit onto the cone.

- The citrus press will not operate if the sieve is not locked correctly.

Mill ⑩

Use the mill for milling herbs, nuts and coffee beans.

- blade unit
- sealing ring
- jar
- sprinkler lid

Safety

- Never fit the blade unit to your machine without the jar fitted.
- Don't touch the sharp blades. Keep the blade unit away from children.
- Never remove the mill until the blades have completely stopped.

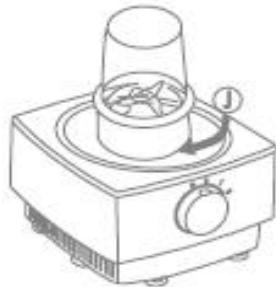

Important

- To ensure long life of your mill, never run for longer than 30-60 seconds. Switch off as soon as you've got the right consistency.
- The machine won't work if the mill is fitted incorrectly.
- Use for dry ingredients only.

To use your mill/coffee grinder

- Put your ingredients into the jar. Fill it no more than half full.

- 2 Fit the sealing ring into the blade unit.
- 3 Turn the blade unit upside down. Lower it into the jar, blades down.
- 4 Screw the blade unit onto the jar until it is finger tight.
- 5 Place the mill onto the power unit and turn to lock (j).
- 6 Switch on to maximum speed or use the pulse control.
- 7 After milling, you can replace the blade unit with the sprinkler lid and shake out your food.

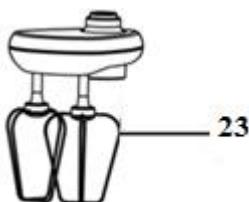

Hints
Herbs are best milled when clean and dry.

To use your whisk
You can use the balloon beater to whip cream, to whisk eggs and egg whites and to make instant pudding, mayonnaise and sponge cake mixture. Do not use the balloon beater to prepare cake mixtures with butter or margarine or to knead dough. Use the kneading accessory for these jobs.

Do not fill the bowl beyond the MAX indication.

- Make sure the bowl and the balloon beater are dry and free from grease when you whisk egg whites. The egg whites have to be at room temperature.
- Always clean the balloon beater after use.

Care and cleaning
1 Always switch off and unplug before

- 2 cleaning.
- 2 Handle the blades and cutting discs with care – they are extremely sharp.
- 3 Some food may discolor the plastic. This is perfectly normal and won't harm the plastic or affect the flavor of your food. Rub with a cloth dipped in vegetable oil to remove the discoloration.

Power unit

Wipe with a damp cloth, then dry. Ensure that the interlock area is clear of food debris.

Liquidiser/mill

- 1 Empty the jug/jar before unscrewing it from the blade unit.
- 2 Wash the jug/jar by hand.
- 3 Remove and wash the seals.
- 4 Don't touch the sharp blades, brush them clean using hot soapy water, then rinse thoroughly under the tap. Don't immerse the blade unit in water.
- 5 Leave to dry upside down.

All other parts

- Wash by hand, then dry.
- Alternatively they can be washed on the top rack of your dishwasher. A short low temperature program is recommended.

Customer care

If the cord is damaged, it must be replaced by the manufacturer service agent in order to avoid a hazard.
